FAMILY ENGAGEMENT

Illinois State Board of Education VISION

Illinois is a state of whole, healthy children nested in whole, healthy systems supporting communities wherein all citizens are socially and economically secure.

ACTION GUIDE FOR FAMILIES

This action guide is intended to provide information and resources to support a family's role as partner in their child's learning.

What is my child learning?
Supporting the whole child!
How do we know my child is learning?
How can I engage with my school?
How can I support learning at home?
Information connecting my family and school.

WHAT IS MY CHILD LEARNING?

K-2 Family Backpack Guide

Illinois Learning Standards

In 2010 Illinois adopted the Illinois Learning Standards incorporating Common Core to support success for all students. These standards were written by educators and experts, in order to provide a consistent, clear and challenging set of grade level learning expectations for all students.

Why Are the New Illinois Learning Standards Important?

The Illinois Learning Standards help all children learn the knowledge and practice skills to be successful in each grade level. These standards set clear expectations for what every student should know and be supported in successful performance in key areas such as: reading, writing, speaking and listening, language, mathematics, science, and social science.

These standards ensure classroom learning builds on the prior year's learning and prepares students for the next year. As you get to know the grade level expectations, working with your child(ren)'s teacher becomes a two-fold support for their learning. To learn more about the standards and their intended impact on educational excellence visit:

	What to Look for in the Backpack	What Can You Do at Home
	Look for assignments that require students to show their work and explain in writing how they arrived at an answer.	Know what concepts are important for your child based on their grade level and spend time working on those concepts.
2	Look for assignments that build on one another. For example, students will focus on adding, subtracting, multiplying and dividing. Once these are mastered, they will focus on fractions.	Ask your child about the math they are doing at school. Encourage them to talk about the math. Ask them how they are learning to add, subtract, etc.
Mathematics	Your child might have assignments that focus on memorizing and mastering basic math facts, which are important for success in more advanced math problems.	Be aware of what concepts your child struggled with last year and support your child in those challenge areas.
S	Your child might have assignments that include demonstrations of the Standards for Mathematical Practice. These are the same for all grades and de- scribe a set of skills and processes that all students should develop as part of their study of mathematics.	Help your child know and memorize basic math facts. Ask your child to "do the math" that pops up in daily life.
	Look for math assignments that are based on the real world.	Provide time every day for your child to work on math at home.

SUPPORTING THE WHOLE CHILD!

Learning Supports

For decades, Illinois has been a national leader in support of the whole child through a comprehensive system of learning supports. The reality of these efforts has culminated in linking prevention and intervention services and systems to reduce barriers in learning and teaching to community efforts to support public health and intensive intervention needs. Some topics that fall under this district and school area are:

1) Health & Wellness 4) Children's Mental Health 7) Student Engagement 2) Brain Development 5) Enhanced Physical Education 8) School Culture & Climate 3) Nutrition 6) Social Emotional Learning 9) Family Engagement Here are some recommended resources for families: American Academy of Pediatrics 🛞 OUR SPONSORS healthy children.org Search for safety, tips, illness, et Healthychildread ve www.isbe.net/learningsupports/ Our Mission (shop AAP Nutrition Fitness Sports Innovation in Action Oral Health Readv4Routines Emotional Wellness Emotional Wellness routines topports ild harvard.edu/innovation-application/ Rdevelopingchild harvard.edu/innovation-application/ Building Resilience Children need to realize that the world is a better place because they are in it. HOW DO WE KNOW MY CHILD IS LEARNING?

Educators measure learning through assessments, such as:

- how prepared a student is for learning (what does a student already know)
- the level of knowledge and/or skill students have acquired after teaching
- snapshots of student retention and use of knowledge or skills

Assessments help educators support student learning by:

- identifying what specific knowledge, skills or concepts need additional attention
- -identifying needed changes in the instruction to meet student needs
- identifying the need for additional learning supports

Teachers support student learning everyday through formative assessment. Formative assessment is the frequent "checks for learning" in the classroom . It provides the dual purpose of giving students an awareness of their learning as well as guiding the teacher to instructional adjustments. Strategies used in formative assessment include: student response via white boards, exit slips, structured group

discussion, response by technology, learning logs, student portfolio entries, informational observations, artifacts, and self and peer reflections. The responses obtained through observation, conversation, formative assessment checks, quizzes, tests, etc. allow students to demonstrate their learning over time.

Quality assessment will not only reflects student knowledge, but also informs and motivates the student to take charge and responsibility of the their learning.

Formative assessment is used by teachers on a daily basis. There are two additional types of assessment that make up a balanced assessment system used to inform educational decisions at the classroom, district and state level. Interim assessments are used by educators periodically throughout the year for predicting student success, evaluating ongoing programs and informing teaching and learning. Summative assessments are used for evaluating student programs or to school success at an end point in time.

Possible Questions for Parents to ask Teachers:

- Can you show me examples of my child' s work that demonstrates their understanding of important concepts?
- How does my child know that they have mastered a specific task or if they comprehend material?
- How often will I learn about my child's progress in learning? How will I get this information?
- How can I, as a parent, learn more about how assessments are used to support my child's learning?

HOW CAN I ENGAGE WITH MY SCHOOL?

Within the Classroom

- 1. **STAY UP TO DATE!** Communicate changes in address, phone number, and email address as soon as possible and inform teachers of your preference!
- 2. **KEEP A SCHEDULE!** Your time is valuable and teacher/school prepared calendars can be valuable for supporting learning and/or special events.
- 3. **OPEN YOUR HOME!** Allowing a teacher to visit your home (especially when your children are young) can be a bridge builder between places in your child's world.
- 4. **SHARE LIFE!** Life events (positive and challenging) can impact your child at school (new sibling, new pet, vacation, sports/music/community achievement, new health issue, separation/divorce, moving, passing of pet, family stress, etc.)
- 5. **VOLUNTEER!** Time can be offered for different levels of involvement including review of social emotional lessons at home (offering best possible amounts of rest/sleep, nutrition, value for educational success, OR assist teacher with prep work, field trips, lunch/ recess support, fundraising, etc.)

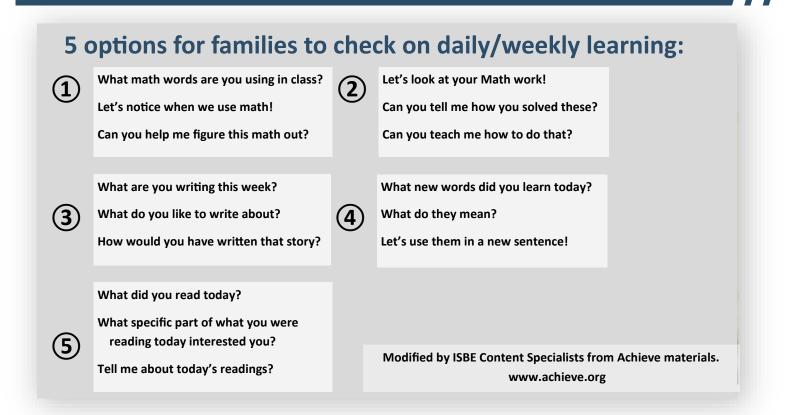

Within the School Building

- 1. SMILE! Smiles and a thank you can support those who support your child.
- 2. **PARTICIPATE!** Showing up and following the directions of the event staff are so helpful when schools gather families together to share what they've accomplished. Let these events be about the kids!
- 3. **RESPECT!** If there are times you don't agree with decisions being made at school, model respectful ways to share your feelings and opinions. ASK for clarity, then ASK for a conversation, then ASK for collaboration towards a solution.
- 4. **DON'T FORGET!** Educators have a great deal of responsibility to ALL families. If something takes place that you interpret as negative or unnecessary - be forgiving. If there is something your child needs, contact your school and discuss it.
- 5. **CELEBRATE!** The entire school staff participate to meet your child's needs, recognizing their efforts
