

Student Sorting Sticks

Illinois State Board
of Education

Each set of 40 “sticks” contain icons to define the members of the groups. Teachers will need to organize the sticks to match their class size and group requirement prior to the students selecting a stick. Example: Class of 35 students with an activity that is set for 7 teams– the teacher will need to make sure the amount of sticks for the students to choose from include 5 each of the “sports” icons. (35 students divided by 7 teams= 5 members for each team.)
